

Geriatric Dog Health Observations

Eating/drinking

- What are your dog's favorite foods and treats? *(Record on the Nutrition and Treat Log on page 19)*

.....

- Has your dog's food preferences changed in the last year?

.....

- Has your dog's appetite decreased or increased?

.....

- Are special enticements or is other assistance needed to get your dog to eat?

.....

- Does your dog drop food while eating or have trouble chewing or swallowing?

.....

- Does your dog have an increased thirst?

.....

- Any vomiting?

.....

Weight

- What is your dog's current weight?

.....

- Has your dog lost weight without being on a diet or without getting extra exercise?

.....

- Has your dog been gaining weight?

.....

Sleep

- Where does your dog prefer to sleep?

.....

- How many hours does your dog sleep during an average day?

.....

- Does your dog sleep peacefully?

.....

- What does your dog do if they get up during the night?

.....

- Does your dog sleep more during the day than they used to and less at night?

.....

Activity level

- What are your dog's favorite activities, toys, and games?

.....

- Who are your dog's favorite people?

.....

- Who are your dog's least favorite beings (squirrels, delivery people, neighbor dogs)?

.....

- Does your dog have other favorite animal friends or playmates?

.....

- Has your dog's activity decreased?

.....

- If so, over what time period—the last few days, weeks, or months, or during the last year?

.....

Strength and vitality

- Has your dog's energy decreased in the last year?
.....
- Does your dog seem less interested in exercise or favorite activities?
.....
- Is your dog weaker during exercise or less tolerant of exercise?
.....

Mobility

- Does your dog need help on stairs?
.....
- Does your dog have trouble getting into or out of the car?
.....
- Any difficulty jumping on or off the bed or couch?
.....
- Need help getting up from lying down?
.....
- Does your dog drag their feet or toes?
.....
- Has your dog's gait changed (walks slower or limps)?
.....

Urine, feces, and house training

- Have you noticed an increase or decrease in urination?
.....
- Any urinary or fecal accidents indoors?
.....
- Does your dog have urine leakage while resting?
.....

- Has the appearance or consistency of your dog's feces changed? Any diarrhea? Constipation?

.....

- Does your dog pass a fecal ball during a walk without seeming to notice?

.....

Ears, eyes, nose, mouth, throat, and breathing

- Have you noticed a change in your dog's hearing?

.....

- Is your dog more or less reactive to noises?

.....

- Does your dog have vision problems in bright light? In dim light? At night? Up close?

.....

- A runny nose or sneezing?

.....

- Watery or goeey discharge around the eyes?

.....

- Bad breath?

.....

- Does your dog's bark sound different?

.....

- Does your dog repeatedly clear their throat?

.....

- Does your dog pant more frequently?

.....

- Does your dog breathe faster or heavier?

.....

- Any coughing?

.....

Skin, coat, and toenails

- Does your dog have increased or excessive itching?

.....

- Lumps or bumps on or under the skin?

.....

- Does your dog have unpleasant or odd skin or ear odor?

.....

- Does your dog frequently lick or chew their skin or hair?

.....

- Is your dog's skin or fur flaky, dry, or oily?

.....

- Have you noticed longer toenails?

.....

- Does your dog enjoy baths? Being brushed or combed?

.....

- Is your dog's coat thinning? Dull?

.....

- Does your dog have areas of hair loss?

.....

Temperature and overall comfort

- Does your dog seek out new or unusual areas to rest that are warm, cold, soft, sunny, or hard?

.....

- Does your dog shiver easily?

.....

- Does your dog pant excessively?

.....

Mentation

(If your dog exhibits these signs, see also the "Cognitive Assessment and Health Concerns for Dogs" form)

- Is your dog less excited to greet you when you get home?

.....

- Has your dog been less interactive with the family?

.....

- More clingy or anxious?

.....

- Does your dog pace during the day or night?

.....

- Stare off into space?

.....

- Seem irritable or act more aggressively?

.....

- Do they seem disoriented or distant?

.....

- Become agitated at certain times of the day?

.....

- Get stuck in odd locations or appear lost?

.....

- Vocalize inappropriately (bark at night for no apparent reason)?

.....

- Do they circle? (If so, is it one direction or both?)

.....

- Have they had a seizure?

.....
